01 Co extruded Decking

What is Co-extruded Decking?

AVID Extruded Decking is manufactured using the latest technology in the industry, with durable, natural wood grain patterns and tropical hardwood finishes.

A new generation of normal WPC material.WPC as the core together extruded with modified plastic as coating to keep the material more stable and natural.

AVID Co-extruded decking stands the competition thanks to its revolutionary extrusion process.The co-extruded composite technology isn't only stunning realistic but also holds up in some of the harshest climates around the world.

No cracking, no splinters, no mold, no staining and no scratching, AVID ensures less labor and more laughter.

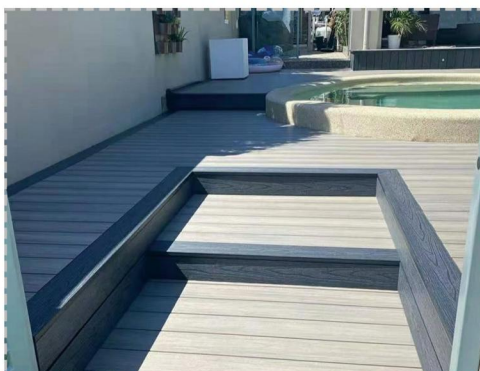

Size: 138*23mm (Mould A-One side is flat,the other side grooved)

Size: 138*23mm(Mould B-Two sides flat)

Size:138*23mm(Solid-One side flat,the other side grooved)

Other colors,sizes,different wood grain styles can be available.

03 Normal Decking

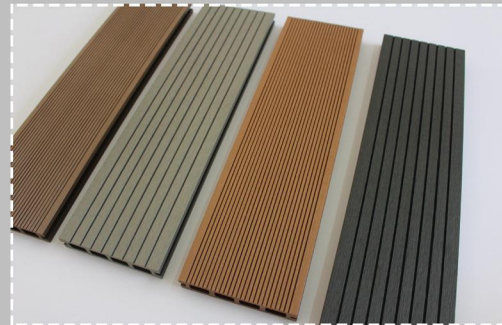

AVID's wood plastic composite decking (WPC decking) is, as the name suggests – formed of a combination of recycled plastic and wood fibres. The two main materials in our products, they work together and result in high performing products, which retain an authentic finish and feel. In forming just the right blend of materials – we believe that we have found a balance that few decking manufacturers have.

Type: Round Hole (Sizes and Designs can be customized)

Type: Solid (Sizes and Designs can be customized)

Type: Square Hollow (Sizes and Designs can be customized)

04 AVID Fence

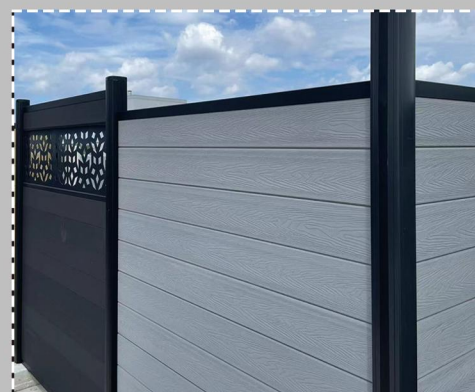

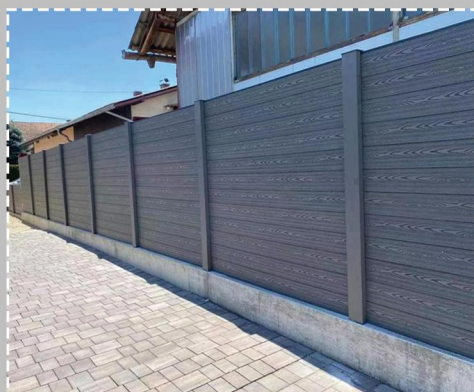

WPC fencing (Composite fencing) is made of recycled wood fiber and high-density polyethylene plastic (HDPE). It combines the advantages of wood and plastic and can be used outdoors for a long time without painting or frequent maintenance. Compared with traditional wooden fences, our composite fencing are more durable, allowing you to relax and enjoy more time outdoors.

Installation without special tools is an ideal solution for outdoor fences and current building materials market trends. We provide a complete fencing system, including all accessories, installation guides and maintenance guides, to help you easily create a durable and beautiful outdoor space. Combined with the design of the fencing, we have also developed the fencing door that perfectly matches the fencing system. Its stylish design is suitable for all types of backyards. Compared with traditional wooden fences, our composite fencing can be made in a variety of sizes and colors.

Advantages Of WPC Fence

- 01 Environmental protection and formaldehyde free
- 02 Anti-corrosion, moisture proof, Anti-UV and Anti-oxidation
- 03 Wear resistance and long life
- 04 Safe and easy to install

Outlook of WPC Fence

Wood-plastic composite (WPC) fence panels have a variety of applications and are often used as an alternative to traditional wooden fence panels. Some of the common applications of WPC fence panels include:

Residential fencing: WPC fence panels are often used for residential fencing due to their durability, low maintenance, and aesthetic appeal. They can be used to enclose a backyard, provide privacy, or enhance the appearance of a property.

Commercial fencing: WPC fence panels can also be used for commercial fencing applications, such as perimeter fencing for parks, schools, and public spaces. They are often used because of their long lifespan and low maintenance requirements, which can help to reduce long-term costs.

Agricultural fencing: WPC fence panels are also used in agriculture to enclose livestock and protect crops. They are resistant to weather and UV rays, which makes them a durable and long-lasting option for outdoor fencing.

Pool fencing: WPC fence panels are a popular choice for pool fencing due to their water resistance and ability to withstand harsh weather conditions. They can provide a safe and attractive barrier around a pool while also enhancing the overall aesthetic of the area.

05 Outdoor Cladding

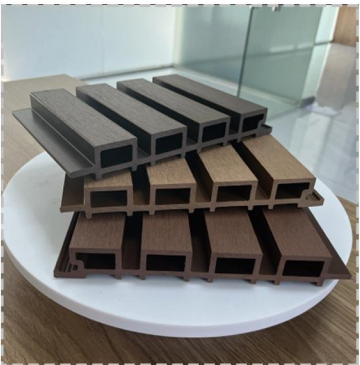

Wood Plastic Composite (WPC) Cladding gives your property a natural timber look that makes it stand out.

The weather-proof material is made out of lightweight composites that withstand heavy rains and high UV rays.
